

## Can You Really Choose A Server Without Paying Anything?

I am sure that you will not trust on this, but yes it is true, today there are some companies which will provide you the services of [프리서버](#) to assist you improve your business. These are turning into very famous, mainly in between new online marketers, as web hosting is not somewhat that most of the people actually wish to consider too much.

Thus, free web servers and hosting look like a wonderful idea to most of the people. Remember, while it can actually work for you, in case you plan to allow online business, you actually must not concentrate on free web servers.

It is very simply, companies of free web server's facility normally don't give you enough space on their web server, and they have to be? In case you are not paying anything, it really does not do them a lot good to provide you needed space on their server except you give some advantages to them; in this particular case, most of the companies dealing in free servers will need you to add a banner advertisement on your website connecting back to them.

They check they will get some amount of traffic in this manner, and thus they would get some advantage out of the association. Though, certainly you cannot plan getting enough space in their web server without paying some amount.

Even, companies of [프리서버](#) normally do not give you with best service, and here is one more thing to remember. Your site would be on a web server with some others, and thus in case anyone on the server does anything to mess it up, you can make a plan on your website being spoiled as well. In case the web server goes down, your site will even go down, as it just has a small part of the web server devoted to it.

Even, in case your website get enough amount of traffic or has many pages, and thus would take up less amount of space, definitely you can't get the services of a free server. With a small space on web server will get, it is just best for a very small site which does not get enough traffic. It is best in case you are a new in this market or just run a website based on your hobby; not in case you plan on either having a big website or enough traffic coming to the website. It will just take up enough space on the web server, and they wouldn't permit your site to run, except you pay something.
